

April 25, 2005

Jerry and Libby Forstner
Magical Farms, Inc.
c/o Douglas Bartman
Kahn Kleinman, LPA
1301 East Ninth St Suite 2600
Cleveland, OH 44114-1824

Mr. and Mrs. Forstner:

I have prepared an appraisal of three hundred eight-five (385) live and deceased alpacas who ate the contaminated Land O' Lakes feed. This appraisal is subject to the assumptions and limiting conditions contained herein: The definition of fair market value, and the pedigree information attached. In my opinion, the subject alpacas had the following values:

Value Premise

1. March 1, 2003, before eating Land O' Lakes Feed	\$ 17,313,750.00
2. March 30, 2003, after eating Land O' Lakes Feed	<u>\$ 3,776,552.00</u>
Total Loss of Value	<u>\$ 13,537,198.00</u>

Sincerely,

Michael Safley

**Magical Farms
Summary
Appraisal Report**

Addendum A

74 DECEASED ANIMALS

This addendum report covers all of the alpacas that ate the Land O' Lakes feed and died; Females, Males, Cria and In Utero Cria. It does not include the Herdsire Row Males that died. (Their value is included below.)

Total value before eating the Land O' Lakes Feed \$1,769,000.

Total loss \$1,769,000.

Addendum B

78 HERDSIRE ROW MALES

This addendum report covers all of the males that ate the Land O' Lakes feed and either died or lived. These males were the heart and soul of the Magical Farms breeding program and include many animals which are considered the foremost foundation males of the United States alpaca industry.

Total value before eating the Land O' Lakes Feed \$10,530,000.

Total loss \$8,451,874.

Addendum C

233 AFFECTED ANIMALS

This addendum report covers all of the alpacas at Magical Farms which ate the feed and lived: Females, Males, Cria and In Utero Cria. It does not include the affected Herdsire Row Males. (Their value is included above.)

Total value before eating the Land O' Lakes Feed \$5,014,750.

Total loss \$3,316,324.

Dates of Inspection
January 31, February 1,2,3, 2005

MAGICAL FARMS

Magical Farms, Inc. is one of the foremost alpaca breeding operations in the world and a recognized leader in genetic excellence in the United States. Their Herdsire Row Males have had a profound influence on alpaca herds in almost every state in the union and Canada. The Magical Farms herd totals 1497 animals. (The average herd in the United States is 8 alpacas.)

- 1. OWNERSHIP:** Magical Farms, established in 1991, is owned and operated by Jerry and Libby Forstner. Their sons, Tripp and Ty Forstner, head up sales and operations, supervising a staff of 23. Libby Forstner is past president of The Alpaca Registry, Incorporated (ARI). Jerry Forstner is past president of the Alpaca Owners and Breeders Association (AOBA) and is a current board member. Both are held in high esteem in the alpaca community and are recognized leaders.
- 2. MARKETING PROGRAM:** Magical Farms, Inc. is one of the true alpaca industry brands. Their annual event, The Breeder's Choice Sale, is attended by more than 1,000 alpaca breeders from around the world and generates sales in excess of \$3,000,000 over three days. Jerry Forstner is past chairman of the AOBA marketing committee. Jerry also conceived of and organized the I Love Alpacas.com marketing co-op which is one of the most successful animal marketing efforts ever. The co-op members include the most successful alpaca operations from every state in the union. Forstner brought alpacas to television across North America.

The proof of success of the Magical Farms marketing program is illustrated in the following graph which depicts the average sale price of alpacas at the national auction and the Breeder's Choice Auction. Magical Farms sale prices exceeded the national average by almost 20%.

**2000-2003 Breeder's Choice Average
\$31,068.00**

**2000-2004 AOBA Auction Average
\$25,089.00**

Breeder's Choice 19.25% Higher

3. **BREEDING PROGRAM:** The excellence of the Magical Farms breeding program is hard to overstate. Alpacas bred, or related to Magical Farms' bloodlines, have won more awards, by far, than any other farm in the United States. Each of these ribbons and championships in both fleece and halter are detailed in Exhibit A. There are thousands of awards that stand as testimony to the strength of Magical Farms' bloodlines. The pedigrees, progeny records, show winnings and overall excellence of their Herdsire Row Stud Males make them virtually irreplaceable.
4. **STAFF AND FACILITY:** The physical plant and staff at Magical Farms is unparalleled. The farm occupies 369.3 acres, includes 12 barns, 50 alpaca sheds, 3 houses, and a veterinary laboratory. The farm utilizes 4 trailers and more than 30 vehicles.

The staff totals 23 people and includes a fleece expert, a veterinarian, an accountant with supporting help, a sales manager and operations manager, not including Mr. and Mrs. Forstner.

A list of staff members and their job descriptions follow.

1.	Libby Forstner	President
2.	Jerry Forstner	Vice President
3.	Tripp Forstner	Vice President
4.	Ty Forstner	Vice President

23.	DJ Millner	Facilities Maintenance

MAGICAL FARMS
APPRAISAL, APRIL 25, 2005

Scope of Appraisal:

1. The value of three hundred seventy-three (373) alpacas 100% owned by Magical Farms, Inc.
2. The value of seventy-eight (78) Herdsire Males that ate the feed
3. The value of Magical Farm's 50% interest in twelve (12) alpacas jointly owned
4. The value of two hundred thirty-three (233) alpacas that were affected by eating the Land O' Lakes feed

Purpose of Appraisal: To establish the market value of the subject alpacas immediately prior to eating the Land O' Lakes feed and immediately after eating the Land O' Lakes feed.

Definition of Market Value: The most probable price which an alpaca should bring in a competitive and open market under all conditions requisite to a fair sale, the buyer and seller each acting prudently, and assuming the price is not affected by undue stimulus. Implicit in this definition are the consummation of a sale as of a specified date and the passing of title from seller to buyer under conditions whereby:

1. buyer and seller are typically motivated;
2. both parties are well informed or well advised, and acting in what they consider their best interests;
3. a reasonable time is allowed for exposure in the open market;
4. payment is made in terms of cash in United States dollars or in terms of financial arrangements comparable thereto.

Ownership Rights Appraised: Either 100% or 50 % of males, females, or in utero cria.

Ownership History: All of the subject alpacas were either 50% or 100% owned by Magical Farms, Inc. during March of 2003.

Pedigree and Registration Certificates: Attached Exhibit A.

INSPECTION

The appraiser inspected the live subject alpacas and the fleece, conformation and pedigrees of the subject alpacas.

Inspection Dates: Jan 31, 2005; Feb 1, 2005; Feb 2, 2005; Feb 3, 2005

DESCRIPTION

- 385 ALPACAS** owned by Magical Farms, Inc.
- 12 ALPACAS** jointly owned by Magical Farms, Inc. that died from eating the feed
- 233 ALPACAS** that ate the feed and lived
- 78 HERDSIRE MALES** that ate the feed

MARKET EXPOSURE PERIOD

The alpaca market in 2003-04 was one of the strongest in the last 10 years. This was due, in part, to the tax advantages: 179 Deduction; 50% bonus depreciation which are set to expire in 2005. The market was also stronger due to a national advertising effort by the Alpaca Owners and Breeders Association, Inc., and the "I Love Alpacas" advertising co-op. Alpaca ownership has been on the rise for several years. The marketing period for the subject animals would have been 6 – 12 months.

HISTORIC ALPACA PRICES (AVERAGE)

**AVERAGE AUCTION SALES HUACAYA FEMALES
2001 THROUGH 2004**

**AVERAGE AUCTION SALES SURI FEMALES
2001 THROUGH 2004**

ASSUMPTIONS AND LIMITING CONDITIONS

1. The alpacas were of sound health prior to eating the feed.
2. The alpacas ate the feed.
3. That upon offering an animal for sale the owner discloses that the alpaca ate the Land O' Lakes feed.
4. That prior to eating the feed the alpaca was fully insurable with no reservations or riders.
5. That after eating the feed the animal's insurance would include a rider excepting death related to the ingestion of the feed.
6. That the information provided the appraiser is accurate. The information includes accounts of farm expenses and animal information.
7. That the seller was freely able to offer the animal for sale, and to transfer ownership.
8. The appraiser has no interest present or future in the alpaca.
9. The opinions of value are based on the dates contained herein.
10. This report is non-public and the opinions contained herein cannot be used in public advertising.
11. The report must be read in its entirety and not be relied on in part.
12. The client agrees to hold the appraiser harmless for mistakes, if any, contained in this report.
13. The appraiser offers no opinion on the toxicity of the Land O' Lakes feed or the extent of the actual physical damage to the animal as a result of eating the feed.

ALPACA MARKET DESCRIPTION

Stud male value is established at three levels of development:

Stud Male Prospect: A male who is 1 – 2 years old, has a recognizable pedigree and is of show quality. Range of value: \$15,000 - \$75,000.

Stud Male: 2 years of age, ready to begin breeding, which is of a quality to be exhibited at alpaca shows, or has been shown at alpaca shows and has won ribbons, or has siblings who have been exhibited and have won ribbons. Range of value: \$15,000 - \$100,000.

Proven Stud Males: Have progeny on the ground with proven quality and show winnings. Range of value: \$75,000 and up.

Female Alpaca: That is a female fully capable of reproducing and delivering live cria. The female may or may not be of show quality. Females range in price from \$6,000 to \$70,000.

Cria: A baby alpaca between 1 and 6 months of age.

In Utero Cria: An unborn cria.

Juvenile: An alpaca from 6 – 12 months old.

Yearling: An alpaca from 12 – 24 months old.

SUMMARY

The alpaca market in 2003 was strong, robust and growing. It could be best described as a seller's market. The alpacas owned by Magical Farms, Inc., were of superior pedigree, conformation and fleece. If exposed to the market without the taint of the Land O' Lakes feed they would have sold at fair market value. The animals that ate the feed were immediately tainted in the market place as a result of the feed incident. The owners were inhibited in their ability to show the animals and fully insure them upon sale. The value of the alpacas was thereby diminished

During 2003, the market for alpacas was very vigorous. Stud quality males sell within a range beginning at \$15,000. A recent sale (2004) of a stud quality suri male was recorded at \$400,000 and a male huacaya sold for \$585,000 (2005). There have been multiple sales exceeding \$100,000, several \$200,000 or more and one recorded at \$325,000.

During 2003, female alpacas were in high demand and sales at farms large and small were good. The sale price of females was highly variable depending on phenotypic quality and pedigree. The range for the sale of Huacaya females was from \$6,000.00 to \$70,000.00. The range for the sale of Suri females was from \$10,000 to \$70,000.

PROFESSIONAL HISTORY

HOMEBUILDER, LAND DEVELOPER AND
REAL ESTATE BROKERAGE AND APPRAISAL
FOUNDED NORTHWEST ALPACAS

1970 - 1991
1984

Mr. Safley was born and raised in Oregon. He attended the University of Oregon and served in the U.S. Navy Seabees doing two tours of duty in Vietnam.

Mr. Safley was elected president of the fledging Alpaca Owners and Breeders Association (AOBA) in 1990. While serving as president of AOBA, he conceived of and became the first editor for *Alpacas* magazine. He wrote for the magazine for almost ten years.

Mr. Safley was chair of the first AOBA alpaca show committee and on the first alpaca marketing committee.

Mr. Safley has written several brochures for the alpaca industry which continue to be printed by AOBA today including: The Alpaca Investment, Fleece to Fashion and the "Alpaca" the "color" brochure.

Mr. Safley wrote and produced the first alpaca marketing video, which was issued by AOBA. He established the first alpaca-advertising co-op, pioneering the breeder's guide model that AOBA still uses. As a member of AOBA's first show committee, Mr. Safley authored the first alpaca show rules used in the United States and Canada. He was the initial organizer of the All American Alpaca Futurity, which awarded the first championship ribbons to alpacas in the United States.

Mr. Safley and his wife, Julie hosted the first Alpaca Fest International at their Northwest Alpacas Ranch in Hillsboro, Oregon. The format used at that time became the format adopted by alpaca festivals across the U.S. and Canada.

Beginning in 1992, Mr. and Mrs. Safley made over 25 trips to Peru, buying goods for Julie's store, selecting alpacas, visiting alpaca producers and processors, establishing the Quechua Benefit with Dr. Mario Pedroza (providing dental assistance, school supplies, and clothing to the alpaca shepherds of Peru's high sierra), and researching his books.

In 1997, Mr. Safley was elected president of the Alpaca Registry Inc. As a member of the Alpaca Registry, he was the driving force behind the levy of screening fees for imported alpacas, which resulted in the collection of several million dollars in revenue. This was used by the alpaca industry for marketing and research.

In 1998, he authored the amendment to the alpaca registry's policies and procedures which was voted on by the ARI members and resulted in the closure of the registry to the registration of offspring of unregistered parents.
